Dear Dr. Augusto Vellozo,

I am very pleased to let you know that "Genome Sequence of the Pea Aphid *Acyrtosiphon pisum*" has been published by *PLoS Biology* today, and is now freely available from our website. You can view your article at <http://biology.plosjournals.org/perserv/?request=get-document&doi=10.1371/journal.pbio.1000313> (You may need to paste this link directly into your web browser).

Because you have chosen to publish your work in an open access journal, you are free to share this link and the content of your work with anyone interested in reading, reproducing or distributing it. Feel free to translate it, post it to listservs or institutional archives, add it to course packs, burn it onto CD or put it to use in any other way.

As time passes, we encourage you to explore the 'Metrics' tab, where comprehensive and transparent information about the reach and usage of the article is available. This information includes article-usage statistics (HTML pageviews, PDF downloads, and XML downloads), citations from the scholarly literature, ratings, comments and notes, social bookmarks, and blog posts. Further information about PLoS' program of article-level metrics is available here: <http://article-level-metrics.plos.org/>.

If you have any questions, or would like to provide additional feedback then please email us at plosbiology@plos.org.

Best wishes, and thank you again for choosing to publish with *PLoS Biology*,

Barbara Lau
